PearlNet Capabilities

Pearl Net LLC (PearlNet) is an established business participating in the Small Business Administration (SBA) Small Disadvantaged Business (SDB) and 8(a) programs and the Department of Transportation (DOT) Minority Business Enterprise (MBE) program. PearlNet is an established systems integrator offering over 16 years of experience providing, managing and supporting enterprise-level, turnkey solutions to the Department of Defense (DoD) and other government agencies in Software Development, Information Transport, Information Systems, Network Engineering, A-E Design & Build Services, Visualization and Multimedia Systems, Electronic Security Systems, Secure and Non-secure Video Teleconferencing and Command, Control, Communications, Computers, & Intelligence, Surveillance and Reconnaissance (C4ISR) Systems. In addition, we provide Professional Services and Staffing, Instructional Systems Design, Courseware Development, Training Production, Resource Scheduling and Classroom / Platform Presentation.

LEED Compliant Green Technologies: PearlNet is the only authorized SBA 8(a) to design, engineer, provide and install Motorola's Gigabit Passive Optical Network (GPON) solution. GPON is US DoD JITC certified and provides security and reliability as fiber is hard to tap, the equipment detects breaks in real-time and provides 128-bit AES encryption required for end-to-end communication. Approved for the US Army's Installation Information Infrastructure Modernization Program (I3MP), No TEMPEST shielding is required for fiber-based network and GPON has a 5 9'+ availability rating and is IPv6 ready (www.pearlnet/GPON).

PearlNet provides a 3D virtual photorealistic simulation product with advanced rendering technology and a design workflow solution that is cloud-based providing advanced modeling and simulation resolution and fidelity. use leading edge software design tools to create, manipulate and visualize complex photorealistic 3D scenes extremely fast, and producing near perfect virtual 3D renderings on a laptop or tablet device

- Products / Services:**
- Business Process Automation
 - Business Continuity, Emergency Management, and Continuity of Operations (COOP)
 - Hosting: Server Co-location, Shared, and Dedicated
 - Application Hosting
 - Managed Services;
 - Monitoring, Maintenance, and Management
 - IT Equipment Sales
 - Network Equipment
 - Computers, monitors, printers, and peripherals
 - Information Transport Systems Design and Installation
 - Audio / Visual (A/V) Equipment
 - Closed Circuit Television (CCTV)
 - Structured Cabling
 - Electronic Security Systems
 - Network Installation, service, and maintenance
 - Video Teleconference
 - On-line Systems Development & Support
 - Help Desk Services
 - Professional and Technical Services (Consulting, Management, and Staffing)

Strategic Advantage: PearlNet is a US owned; Atlanta, Georgia based company aligned with partner companies and product distributors providing affordable technologies and services to Commercial, State and local government, Department of Defense and other US Agencies.

NAICS Codes: 236220, 238210, 334112, 334290, 334310, 423430, 511210, 517110, 515210, 518210, 541310, 541330, 541340, 541350, 541410, 541420, 541430, 541490, 541511, 541512, 541513, 541519, 541611, 541613, 541618, 541620, 541690, 541712, 541720, 541990, 561110, 561621, 611420, 611430

Sales & Use Tax ID – 060395369 State Withholding Tax ID – 196337-AA

Business Process Engineering and Management (BPE&M) Is the practice of implementing tools to enhance change while moving towards computerization of processes through iterative development. PearlNet's BPE&M group is well versed in many market verticals and understands the challenges faced within gathering, analyzing, defining, modeling, and developing automated business processes. Our ultimate goal is optimization and scalability allowing your business processes to continue to grow. Our Process Engineering team has extensive experience in developing processes and procedures to bring companies into compliance with ISO 9001:2000 and ensure software development complies with the Software Engineering Institute's CMMI standards.

Digital Transport Delivers design and implementation services for the build-out of information transport systems in strict compliance with ANSI/EIA/TIA standards. For 16 years we have provided quality services to both private sector and government clients across the nation. These solutions include Structured Cabling (Inside & Outside plant), Network Engineering and build outs, Data Center, Presentation Systems, CCTV, Access Control systems, and wireless networking solutions. PearlNet is certified to design and install structured cabling systems and offer warranties of 15 to 25+ years warranties for most major manufacturers.

Visual Systems and Data Solutions Provide complete turnkey Mission Critical C4 (Command, Control, Communication, and Computers) Infrastructure and Operations A/V systems. Product and components are specified by our engineers for installation by certified installation teams. These solutions include engineering, design, components, installation user training, maintenance, and warranty. Our solutions include large screen visualization, audio and video conferencing, signal processing, engineered human interface systems. These solutions structured cabling, presentation technologies, CCTV, Access Control systems and wireless networking.
